Mendocino Coast

FOREST NURSERY
Fort Bragg, California

Price List
Afforestation and Lining-Out Stock
"Grown in Mendocino County, California"
Issued November, 1940

"AGE" TABULATION - notation explained. The numbers between dashes (1-0, 1-1, 1-1-1, etc.) indicate; first, number of years in seedbed; - second, third, etc. number of years in each transplanting: a summation of the figures gives the total age; 1-1-1 - 3 yrs., T 2.

SEEDLINGS & TRANSPLANTS - Though often less in size, transplants are invariably superior to seedlings of the same age in their root development.

PACKING - The stock hereafter listed is shipped "bare-root", without ball of earth carefully packed in wet sphagnum moss.

STOCK - Every effort is made to insure that our stock is true to name and of satisfactory quality. Should any of it prove otherwise, despite our precautions, we will gladly replace it, or refund the purchase price. We cannot, however, be held liable for any amount greater than the original purchase price.

PRICES - quoted in this list are f.o.b. Fort Bragg. Cash or satisfactory references required with orders. Orders for less than one hundred to a minimum of ten of any item can be computed at the "per 100" rate given, but if the total order is under \$ 2.00 in value a charge of 25¢ will be made for packing. Our acceptance of any order is subject to stock being still unsold and in accordance with priority of its receipt. Favorable rates will be quoted, on request, on lots of more than 250 of any one variety.

SALES TAX - Remittances for purchases resting within the State of California should include the amount of the sales tax due unless the purchaser declares the order for resale.

SIZES As quoted, by average of beds when checked; many species continue in growth throughout the season.

<u>CONIFERS</u>	<u>Age</u>	<u>Size (Inches)</u>	<u>Price per 100</u>
